Australian Native Birds

Distribution, Trends and Conservation

1. Where are Australia's native birds?

① Choropleth Map

Threatened native bird species as % of all recorded native species by state/territory

② Dot Map

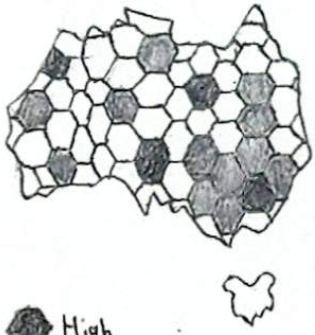

Sightings of a selected native species (e.g. Rainbow Lorikeet)

Each dot = 1 sighting

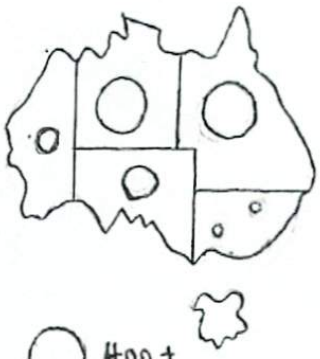

③ Bin Map

Density of bird sightings across Australia

④ Proportional Symbol Map

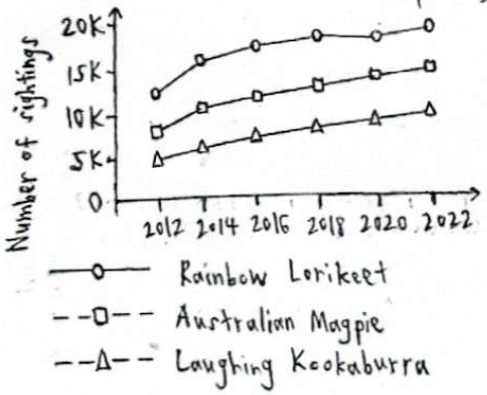

Native bird species richness by state/territory

2. When and which birds do we observe?

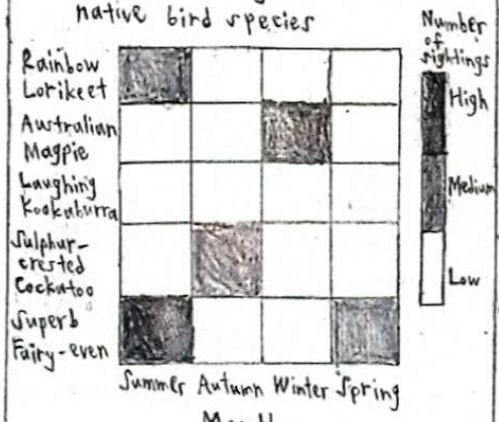

⑤ Line Chart

Total native bird sightings over time (selected common species)

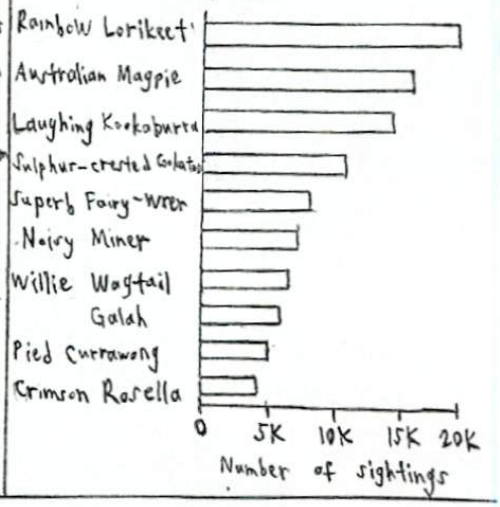

⑥ Heat Map

Seasonal sightings of selected native bird species

⑦ Horizontal Bar Chart

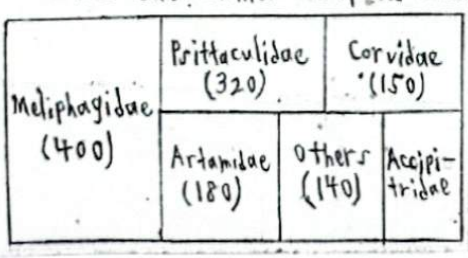

Top 10 most frequently recorded native bird species

3. Bird Diversity and Conservation

⑧ Treemap

Native bird families and species count

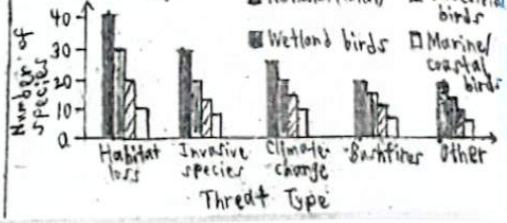

⑨ Stacked bar chart

EPBC-listed native bird species by state/territory and conservation status

⑩ Grouped Bar chart

Threatened native bird species by main threat type
