Australian Native Birds

Distribution, Trends and Conservation

1. Where are Australia's native birds?

① Choropleth Map

Threatened native bird species as % of all recorded native species by state/territory

- > 20 %
- 10-20 %
- 5-10 %
- 1-5 %
- < 1 %

② Dot Map

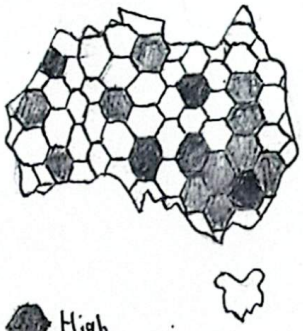

Sightings of a selected native species (e.g. Rainbow Lorikeet)

Each dot = 1 sighting

③ Bin Map

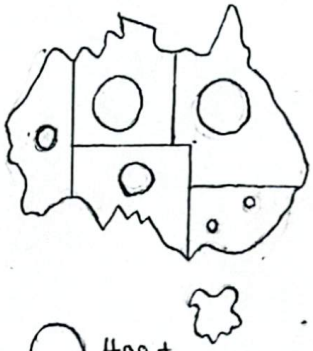

Density of bird sightings across Australia

- High
- Medium
- Low

④ Proportional Symbol Map

Native bird species richness by state/territory

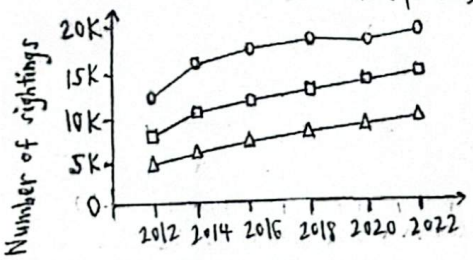

- 400+
- 200-400
- 100-200
- <100

2. When and which birds do we observe?

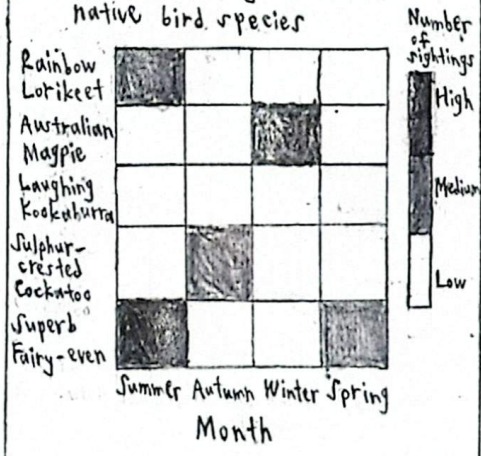

⑤ Line Chart

Total native bird sightings over time (selected common species)

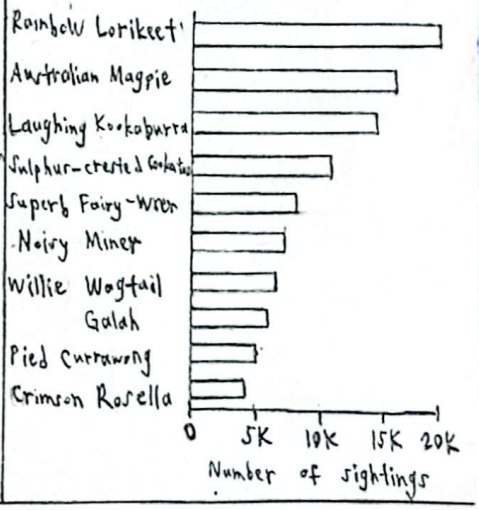

⑥ Heat Map

Seasonal sightings of selected native bird species

⑦ Horizontal Bar Chart

Top 10 most frequently recorded native bird species

3. Bird Diversity and Conservation

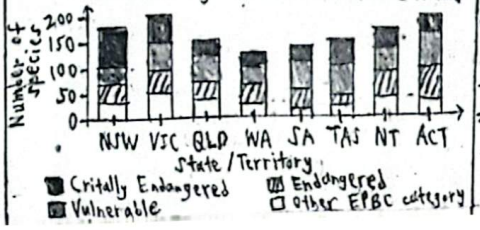

⑧ Treemap

Native bird families and species count

Meliphagidae (400)	Psittaculidae (320)		Corvidae (150)
	Artamidae (180)	Others (140)	Accipitridae (90)

⑨ Stacked bar chart

EPBC-listed native bird species by state/territory and conservation status

⑩ Grouped Bar chart

Threatened native bird species by main threat type
